

**TOP SECRET CHESSE**

**DRAFT**

**HANDLE VIA TALENT  
CONTROL SYSTEM ONLY**

15 January 1958

**MEMORANDUM FOR: Recipients of CHESSE - Tracker Duplicate-Positives**

**SUBJECT: Titling of Print or Graphic Reproductions Derived  
from Tracker Classified TOP SECRET - CHESSE**

1. As the recipients are aware, each frame of duplicate positive or duplicate negative Tracker film does not always contain the security classification TOP SECRET-CHESSE or complete titling, although the classification TOP SECRET-CHESSE does appear on the leader at the head and tail of the reel of film containing a series of frames. The reason that proper titling and security classification has not been placed on each frame of original negative is to facilitate operational expediency and because so few prints are reproduced from the Tracker.
2. Special attention is called to problems involving the reproduction of all prints or graphics from that Tracker film NOT bearing the TOP SECRET - CHESSE classification on each frame. The TALENT Manual regulations (Chapter V, Paragraph 12, "REPRODUCTION") prescribe that whenever permission has been granted by proper authority for the reproduction of such prints, it will be the responsibility of the Senior Intelligence Officer of a component, or his designee (TCO/TSO) to insure that all TALENT reproductions are properly registered and that each print is clearly marked with the security classification TOP SECRET-CHESSE and that such prints are retained within the TALENT Control System.
3. It is requested that dissemination of the foregoing instructions be relayed via the TALENT Control System to components overseas which are recipients of duplicate negative or duplicate positive Tracker film.
